# Enjoy the Effects of Acupuncture without Feeling the Needles

## *With the Electric Acupuncture Pen Plus*

The Electric Acupuncture Pen Plus TopGadget

Chinese medicine is one of the world's oldest sciences, and despite the fact that its approach to curing some illnesses is completely different from that of Western medicine, the effects are sometimes a lot better. One of the most mysterious parts of Chinese medicine is acupuncture, a process during which certain ailments are treated by sticking very sharp, thin needles into specific areas of the body.

However, for some people, this process might prove to be way too painful, and for this reason, the guys over at TopGadget are offering users their brand-new Electric Acupuncture Pen Plus, which lets users quickly locate and treat acu-points without needles or piercing of the skin.

Practically, this thing should deliver all of the benefits, but none of the pain involved in this form of treatment. Of course, it remains to be seen whether this thing is actually able to deliver on its promise or not, but user comments on the vendor's page seem to point out that the answer to this dilemma is a positive one.

According to the vendor, users can also easily adjust the intensity of stimulation, while the treatment time can be adjusted to meet one's individual requirements. Additional features of Acupuncture Pen Plus include three user selectable program modes for blood circulation, muscle stimulation and analgesic pain relief.

The device is accompanied by a pair of earphones, which allow users to easily locate the acu-points without disturbing other people, and can be easily carried around, given the fact that it measures just around 170 x 18 x 37 mm, at an overall weight of 44 grams.

The Electric Acupuncture Pen Plus presented by TopGadget sells for somewhere in the vicinity of 34 US dollars, which is not even that high a price, as long as this thing can deliver on its promise, namely painless treatment.

We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is .
