[QIO Systems Launches PANiQ Wearable Consumer Electronics Brand](#)

First such brand in the world

QIO Systems, one of the leaders on the market of wearable electronic modules, announced the launch of its PANiQ wearable electronics system, making PANiQ the world's first wearable consumer electronics brand.

"We are building the next generation of wearable electronics and interactive fashion at QIO Systems," says QIO Systems Co-founder and President, John Collins. "PANiQ changes the game by making wearable electronics affordable and achievable for brands across all segments. The PANiQ program gives fashion and sportswear manufacturers the luxury to stay focused on their core competence of fashion, and leaves PANiQ to manage the rest." While QIO and PANiQ work closely with apparel brands and manufacturers in order to get the wearable technology integration perfectly made, the comprehensive modular program PANiQ is completely innovative and ingenious, as it allows consumers to choose the functions they need. The most exciting aspect of the PANiQ system is that consumers can choose to connect an iPhone, iPod or BT phone, but that's not the only attractive aspect, as they can also choose from a range of different, colorful module designs to better fit their personality and style. Through the PANiQ online shop, one can browse and select the different modules with prices ranging from as low as 20 US dollars for the iPod controller, up to about 80 US dollars for an iPhone or BT controller. But this 'one-stop-shop' from PANiQ lets you browse and order selected interactive apparel from different brands. Last but not least, you can even buy earbuds fitting to your selected style from the same place. By connecting PANiQ controllers to PANiQmode interactive clothing, you can control your iPod and other electronics with PANiQ's integrated smart fabric buttons. So, what are you still waiting for? Go get yourself a PANiQ system. We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is .
