[Revenge of the Fallen... Transformers Phone](#)

Coming from China, of course

It's pretty funny to see how some people (or some companies) try to bank as fast (and as much) as possible on the success of a certain franchise, whether they have the right to do so or not. And in the case of the Chinese mobile phone-manufacturing company Shanzai, I'm pretty sure the latter applies, since its Transformers phone arrived on the market right after the release of the hugely successful "Transformers 2: Revenge of the Fallen" summer blockbuster.

Now, while it's unlikely that Shanzai has ever entered a copyright deal with the owners of the "Transformers" IP (intellectual property) (as was the case with [LG's Transformers](#) handheld), the truth of the matter is that its handset is not half bad, according to a report by Chinese website [M8cool](#). In fact, as far as the design is concerned, the Transformers phone might prove to be quite successful with the fans of the franchise, albeit the features are most likely to disappoint.

Hence, while there are several Transformers-related design elements installed right on the phone, on the inside, there's nothing really "transforming" about this handset. In fact, we're talking about a rather average [2-SIM](#) product, equipped with a 2.2-inch display and able to deliver a QVGA resolution.

Furthermore, this thing works on the [GSM 900/1800MHZ](#) frequencies, sports an FM radio receiver and even an acceleration sensor, although no information on just what functions the respective sensor can be used for has been provided. However, it's important to mention that this thing is apparently targeted at an international audience, given the fact that the user interface is available in 13 different languages.

And now, for one of the most important issues related to Shanzai's handheld - the price. Hence, the Transformers phone sells for just around 50 US dollars, which makes it cheap enough for pretty much everyone to afford, and I'm referring here especially to all you crazy Transformers (and/or Megan Fox) fans out there.

We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is
