X091 USB Flash Drive
Team Group

[Team Group Previewing the X091 128GB USB Flash Drive](#)

Not impressive

Team Group, yet another manufacturer of flash memory products, has revealed that it will be launching at the end of 2009 its latest product, namely the brand new X091 USB disk. This disk will come to provide users with an impressive storage capacity of 128GB, running at high speed enabling business people to carry on with their daily routine and not be pulled back by [waiting for files to be copied onto their USB flash stick](#).

As an addition to the high speed data transfer, the X091 USB disk also comes in a shock absorbency case, along with a slide USB connector, in order to protect that exact transfer interface (because if that breaks, then the device is quite useless), as well as mark the thoroughly thought and crafty design of Team Group.

The manufacturer also prides on the fact that its flash memory stick, the X091, is silent, but I can't help but wonder what memory flash drives they have been playing with that were noisy. Maybe little lemmings were inside and partying, or carrying the data between the stick and their computers.

Even more, Team Group took the X091's development further, not only resuming to functionality, and made an impressive design featuring sandblasted treatment on a chessboard like pattern that [stands to mark out the coolness and convergence of the disk](#), just like an extraordinary knight riding across the chessboard. The storage capacities that the X091 USB stick is offered in range from the smallest 16GB to the top notch highest capacity 128GB model for users to choose from in order to meet their desires for storing music, movies, documents and graphic files.

Getting to the transfer speeds, the X091 has a four-channel design that boosts read speeds of up to 30-34MB/sec and 25-31MB/sec write speeds. There is no pricing available yet.

We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is
