## [Technocel Introduces Its PowerPak Double Charger](#)

### *Portable and efficient*

PowerPak  
Technocel

Technocel, yet another provider of accessory solutions with more than 11,000 products targeted at the wireless market, just announced its latest development, namely the Technocel PowerPak. [This is a portable battery pack and home charger](#), mixed in one solitary product.

The patent pending technology will probably replace all the chargers available today, with a single universal solution that will power safely all of the USB devices in a home, car, airport and just about anywhere else. miniUSB has already been said to become the standard charging plug for mobile devices, so I don't see why not. The best thing with this type of charger is that you'll be able to unplug it from the outlet and it will still keep charging your devices while you're already on the go.

"We are thrilled to provide an all in one charging solution that will power a variety of USB devices at home or on the go" says Rami Rostami, Technocel CEO and Founder. "It also offers our dealers an opportunity to replace all of their home chargers with one unit, which will create better inventory SKU management, as well as less inventory risk. For cell phones, PDA's, MP3 players, reading devices, Bluetooth headsets and more, the PowerPak will give your accessories instant power, anytime, anywhere."

Technical details say the PowerPak will [recharge your handheld devices at the same time as it recharges itself](#) via the wall outlet. As for backup power for the serious on-the-go users that always run out of battery right when they need the phone, the PowerPak will provide up to 3 hours of extra talk time. For the eco conscious fellows, mind that this meets Energy Star requirements by drawing very minimal power from the outlet when no additional power is needed.

The intuitive LED indicator lights display the remaining current in the PowerPak battery, at the press of a button. Included interchangeable tips ensure compatibility with 95% of common handheld USB devices. It will be available by November 1 for a MSRP of \$49.99.

We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is
