Under $100 Hivision SpeedPad Is a Cheap Solution for Android Lovers

Pretty fly for a visionHI

Hivision presents cheap SpeedPad tablet PC
Hivision company LTD.

Besides the giant companies that are flaunting epic gadgets at CeBIT this year, there are smaller ones displaying the affordable aces up their sleeves, as seen in this video from Jkkmobile. The guys there caught this Android (which can come with Windows as well, by the way) tablet PC that will be extra affordable and that will do its best to impress its future users with its pretty neat specs. Sure, because it is a cheap model, it will probably break when you least expect it and especially on the exterior, as some sacrifices had to be made when producing it with a low-budget. The interior is alright.

Being a 7-inch tablet with a resistive touchscreen, this one will always keep you connected as it comes with connectivity options of a regular product from this category.

At home, run broadband speed internet on it through the Ethernet port and on the go, you have the power to choose among 3G, Wi-Fi and Bluetooth so that you never stray from the world wide web.

It runs on Android 1.6, which should run quite alright on its Samsung ARM 11 6410 processors at 800 Mhz. Like I said, it should, but at this price, if you desperately need a tablet, this SpeedPad from Hivision will always be an option. The producers haven't made it for emergency uses only, as it offers a sweet six-hour autonomy.

It even has all the controls on the side, D-pad and mouse ones so that anyone can navigate more easily. We all have preferences regarding the use of gadgets such as this and that is why we are going to always need some extra control options.

Also on the subject of extra options, the SpeePad from Hivision offers video out for using it at home from the comfort of your own display. Look at the movie and see for yourselves.

We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is .
