The white "Beats by Dr.Dre"
Apple

White Monster Beats by Dr. Dre Headphones Pop Up at the Apple Store

Adapted for usage with the various Apple players and devices

Ever since their launch, the Beats by Dr. Dre headphones, developed by the famous rapper in collaboration with Monster, have enjoyed quite a lot of time in the spotlight by making a lot of public appearances, not to mention some cameos in certain music clips (including some of Lady Gaga's).

And it seems that these special headphones have managed to create quite a stir on the market, because Apple, which is actually pretty famous for seriously selecting its product partners, has decided to offer for sale in its stores a special all-white version of the "Beats" headphones.

While this all-white product is not significantly different from the standard version, it does come with a special accessory, namely the iSoniTalk headphone cable with built-in answer button and microphone, which allows users to easily answer calls while listening to music. Furthermore, the headphones feature extra-large speaker drivers and a high-power digital amplifier, powered isolation technology, a compact minijack connector to reduce bulk and an integrated mute button. Plus, in order to keep that glossy white color there for as long as possible, the device sports a scratch-resistant finish.

Similar to their black counterparts, the white "Beats" headphones weigh around 260 grams and provide a frequency response between 20Hz and 20kHz, as well as a maximum output of 115dB. Moreover, they require two AAA batteries in order to operate and are accompanied by an audio cable with a length of around 1.3 meters (different from the iSoniTalk mentioned above).

Naturally, pricing for the white version of the "Beats by Dr. Dre" headphones is pretty high, customers having to cough up an estimate 300 US dollars, for which they'll be getting, besides the headphones themselves, a Monster Cable headphone cable, the Monster iSoniTalk iPhone enabled headphone cable, a rigid Tour case, an anti-microbial cleaning cloth, an 1/8 to 1/4-inch adapter and two AAA batteries.

We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is .
